

Weaving Patterns

Over the last 2,000 years, weavers of the North American Southwest have woven simple and complicated patterns. Let's try a simple one:

1-under-and-1-over sequence: 1. Cut off the red rectangle at the **thick black** dotted line.

2. Cut the 7 red strips along the **black** dotted lines. 3. Cut along the **red** dotted lines up the yellow rectangle. 4. Place one red strip at the bottom of the yellow rectangle and slide it up slightly. 5. Get 1 yellow strip **under** the red strip and 1 yellow strip **over** it, the next **1 under and 1 over** the red strip till you reach the end of the yellow rectangle. 6. Slide the red strip up gently, to the top of the yellow rectangle. 7. Place the next red strip at the bottom of the yellow rectangle and start with going **over** the first yellow strip and **under** the next. And so on.
